

Project

Penwal engineers and builds hundreds of unique, decorative light fixtures for multiple Mills Corp. mall locations nationwide.

Fixtures featured a variety of materials and were all UL listed.

Scope of Work

- Design Refinement
- Engineering
- Project Management
- Materials Selection
- Fabrication of Elements
- Craftsman finish
- Custom Lighting
- UL Listing
- Installation

Client

Mills Corp./Simon Property Group. Various designers.

This giant custom chandelier measures about 30' across and features multiple decorative light pendants.

Let There Be Light.

Penwal is proud to have engineered and fabricated multiple, highly unique and decorative custom light fixtures for Mills Corp./Simon Property Group malls nationwide.

Mills malls feature varying "neighborhoods" throughout the environment, each with its own theme. By going with Penwal, Mills was able to use a single shop to create all fixtures regardless of theme, material and light source. Light fixtures fabricated by Penwal used fiberglass, acrylic, steel, aluminum, fabrics and wood.

Elements were created from designers' renderings, and several went through mock-up and maquette stages. All fixtures were UL listed.

Custom lighting evokes Pittsburgh's ironworking heritage.
