

### Project

Penwal engineers and fabricates multiple designer seating elements, shade structures, kiosks and wayfinders for The Block at Orange, a Mills Corp./Simon Property Group shopping center in Southern California.

### Scope of Work

- Design Refinement
- Engineering
- Project Management
- Materials Selection
- Fabrication of Elements
- Paint & Finish
- Lighting & Electrical
- Installation

### Client

Mills Corp./Simon Property Group. Design by CommArts.

One of two large scale custom fiberglass benches engineered and fabricated to mimic a strip of movie film, placed outside the theatre.

## Preserve Your Design Intent

The Block at Orange, an outdoor shopping center in Orange County, California, features a large variety of custom FF&A elements throughout the environment.

Rather than identify multiple fabricators and contractors for these items, the Mills Corp. hired Penwal -- as it had many times in the past -- to engineer and fabricate these custom creations, including cast polymer seating elements, two custom fiberglass "film strip" benches, stainless steel shade structures shaped like giant leaves, kiosks, custom signage and wayfinders.

Penwal is proud to have fabricated multiple elements for Mills Corp. locations across the United States.
