Scope of Work

- Design Refinement
- Engineering
- Project Management
- Metal Fabrication
- Paint and Finish
- Lit Signage
- Electrical
- Installation

Client

Walt Disney Imagineering.

Penwal engineered, built and installed the very unique vehicle and pedestrian monument entry signs for Disneyland in Anaheim, California.

Turn Your Venue into a Destination

The most unique environment on earth, Disneyland uses various thematic elements to take its visitors away to a world of magic and wonder.

Penwal is proud to have worked frequently with Disney to reinforce this message. At its various vehicle and pedestrian entrances, we engineered, fabricated and installed the unique monument signs that greet visitors to the park.

The signs integrated a variety of materials, including stainless steel, fiberglass and plastic, which Penwal fabricated in its 61,000sf shop. We also handled all paint, lighting and electrical in-house.

Visitors to Disneyland are greeted by this giant monument sign. Penwal engineered, built and installed the arch, curtain walls and central spires.

Penwal fabricated and painted all metal work in-house.
